GO WITH THE FLOW

This tour allows you to explore the Hawaii Volcanoes National Park and Hilo's waterfalls in flight and on foot. This adventure departs from the Kona International Airport in an executive style Bell 407 helicopter. En route to the volcano area, you will overfly the world-famous Kona coffee district and skirt three of Hawaii's towering volcanoes: Hualalai, Mauna Kea and Mauna Loa.

Upon arrival to Hawaii Volcanoes National Park, your pilot will search out the day's activity – sometimes a burning forest fire, a stream or lake of glowing lava, or an entry into the ocean – often only accessible by air. After the first part of your air experience, you will land at the Ka'u Coffee Mill, where you will be met by your expert guide. After your coffee farm tour and tasting, travel through the remote and rugged landscape of Ka'u – home to Hawaii Volcanoes National Park. Discover how the powerful forces of nature have shaped the people and landscape of this dynamic region, Hawaii's largest land district. The perfect blend of nature and culture led by an expert guide, this tour reveals what it's like to live on two active volcanoes.

Lunch at Volcano House Restaurant is served during your adventure before you are met by your helicopter at a nearby ranch, and take to the skies again, for your return flight to Kona.

TWILIGHT VOLCANO ADVENTURE

Witness the magic of Kilauea as we explore the island's incredible range of ecosystems and climate zones before experiencing first-hand the phenomena that makes it possible – an erupting volcano. Working our way across the island, we'll take in sites along the Saddle Road, home to some of the rarest ecosystems in the world.

Upon arriving at Hawaii Volcanoes National Park, we'll explore the natural wonders of this World Heritage site. The summit caldera, steam vents, cinder fields, and native rainforests are all on our 'must see' list. In addition, we'll include stops at the Jaggar Museum, the Visitor Centre and Kilauea Iki.

As conditions change daily, we tailor your experience to the current eruptive events. After exploring the natural wonders of this World Heritage site, we'll check current conditions to see where the best possible viewing of the eruption site is most active. Our choice may require us to leave the park to locate possible breakout flows from the Pu'u O'o Vent or the Halemaumau Crater which contains a hidden lake of molten rock that glows after dark.
